Pleasure of Rose Growing

It has been said that Roses do not flourish in this country as they do in Europe. However true this may have been, it scarcely holds true today. With the many new Roses introduced into our country during the past two years, there are a large number of varieties which are well adapted to the different growing conditions in various sections, and the time is here when a very favorable comparison can be made between Roses growing in the North and Roses growing in the Southern States and California. Also between the results here and those of the "World's Famous Rose Growing Section of Europe."

There is every reason, therefore, for the planting of a Rose garden to be a most fascinating and interesting work. The winter planning, selection of the most adaptable varieties, sending the order, receiving and planting, watching the growth and development of flowers of the different varieties is highly interesting.

Comparative Value of Roses

Don't think any Rose too small to do well. The roots of the one-year plants being carefully protected in pots, permits of the shipping and successful planting of them anywhere. Roses of this size are to be recommended for all Rose growing sections. If you wish the largest and best Roses for better effect and more bloom, then Roses of the two-year size from pots are to be recommended.

Advantage of Pot-Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. This kind of a Rose, being in a growing condition, can be planted at any time through the growing season, and in this has many advantages.

Roses On Their Own Roots, Not Grafted

For the average amateur Rose planter, we cannot too strongly recommend the desirability of own-root plants. It is generally conceded now by all Rose growers that they are far preferable to budded Roses and much more satisfactory in every way. The Garden Roses of today are mostly the compounds of many types and species, and it is a fact that upon some varieties the foliage is so similar to that of the wild root growth that it is not readily detected by those who are not professional Rose growers. It follows, therefore, that only professional gardeners who thoroughly understand the science of budding and the growing of budded Roses should ever undertake the planting of budded Roses. In consequence, everything gives way to suckers and sprouts of wild Roses. Own-root, pot-grown Roses never produce wild Roses. It is impossible for them to produce anything but the genuine variety. The most prominent Rose growers of today are growing Roses on their own roots.

Springfield, Ohio, U. S. A.

Is the acknowledged headquarters in the United States for the growing and shipping of plants by mail and express, and is the greatest Rose producing center in the world. It is centrally located, geographically, with four express companies—American, Adams, United States and Wells Fargo—which connect with all others and has unequal facilities for receiving and shipping orders and procuring the lowest rates to all parts of the country.

Special Express Rates From Springfield

By reason of all Express Companies having offices at Springfield, and through special arrangements made with all companies, shipments to our customers are carried at a special rate, running to 25 and 33 1/2 per cent. less than for regular merchandise. As this is the largest shipping point for plants in the U. S., you are insured of special rates from Springfield.

Why We Can Save You Money

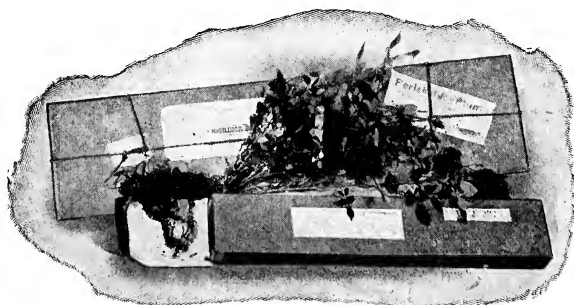

All of our goods are grown in large quantities for wholesale purposes. Our retail prices are based on our large production, giving our retail customers an easily appreciated advantage. By adopting the plan, special offers and collections, we reduce our selling expense to a minimum and as our sales to you are by mail, execution of the orders are attended with comparatively little expense.

Our Prices

will compare favorably, we believe, with those of any responsible firm in the United States. We guarantee our seeds to give satisfaction and every shipment is sent out under our guarantee of safe delivery.

Plants By Mail

All stock listed in our Catalog, unless noted, is offered at prices marked, by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States.

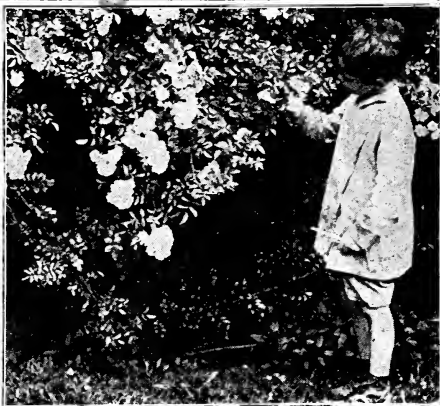

Regular Mail, Parcels Post and Light Express Box.

PARCELS POST

Heretofore the limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcels Post simply gives the added privilege of transferring through the mails packages of mailable plants, bulbs, seeds, etc., of weight up to eleven pounds. Do not construe this to mean, however, that the increased size of package allows carrying express size plants. It only permits of sending you larger orders of mailable plants.

Premiums Our terms being Cash with the order enables us to give additional plants on orders amounting to \$1.00 or more, in the following proportions:
On \$1.00 worth of goods bought at single rates, select to the value of.....\$.20 extra
These premiums cannot be allowed \$2.00, .40 extra on Special Offers, Collections or goods \$3.00, .60 extra bought at dozen rate, or Seeds in bulk, \$4.00, .80 extra or on Nursery Department. \$5.00, 1.00 extra
The above additional premiums will be allowed on mail and express orders and larger orders in proportion.

Remittance With Order Please send money with your order sufficient to cover the entire bill; it will facilitate the execution of your order. The safest and most convenient way of transmitting money from one point to another is by means of postoffice orders. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at all postoffices. The fee is but five cents for \$5.00 and under.

While we assume the risk of paper money enclosed and carefully sealed in our self-addressed envelopes, silver money, except in registered letters, is at the risk of the sender.

SHALL WE REMOVE SOIL FROM ROOTS AND SHIP EXPRESS PREPAID? Read these Conditions Carefully

Removing the soil, or ball of earth, from the roots of the plants places the shipping of plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, **except**, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Aracarias, Camellias, Rhododendrons, Banana Plants, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Such plants as these must be shipped without the roots being disturbed if one must expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size Shrubs, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far-away sections of our country with the soil removed, and transplanted safely.

Postage Stamps

These can be sent for fractional parts of one dollar or where postoffice orders cannot be had, provided two cents in stamps extra are sent with every remittance. None but stamps in perfect order accepted.

Fall Catalogue

of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and will be sent to all our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

If You Wish Orders Held

Be sure to say so, then we can book your order (and set items aside for you if necessary) until proper time to ship; otherwise we will assume the order is wanted at once.

Our Nursery Department

is separate and distinct from our greenhouse, and it is necessary, therefore, that all items selected from this department, and from pages 109 to 111 inclusive, be shipped direct from our Nursery under separate transportation charges.

Errors and Complaints

We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in any way damaged or unsatisfactory, we wish to be promptly notified of the fact, and will make such an adjustment of your claims as will be satisfactory.

Foreign Orders

Ten per cent. extra should be added to all Foreign Orders for Roses, Plants, Bulbs, Seeds, etc., that go outside of the U. S. A. or its possessions. This additional amount is needed to cover the cost of extra postage and packing on long distance shipments. Payments are preferred by Money Orders. Many countries receive goods through Parcel Post from U. S. A. and most postoffices throughout Mexico receive packages by mail up to and including 11 pounds each in weight.

McGREGOR'S Fancy Carnations

(See Colored Plate Between Pages 48 and 49)

When the people throughout the country were vainly seeking for an appropriate flower, acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue.

While it is generally conceded that the Rose ranks first for producing flowers for cutting, the Carnation is gaining in popularity for its profusion of bloom, and for the exquisite fragrance of its flowers.

The last few years have seen an entirely new Carnation, forming one of the most beautiful and desirable flowers we have, flowering freely during summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter.

GRAND SPECIAL OFFER No. B-482—We will send postpaid to any address the full collection of 20 selected cut-flower Carnations as illustrated on the color plate, amounting at regular price to \$3.50, at the special price, postpaid, of \$2.80. See page 48 for prices for any one variety or for special offer for half of the collection.

McGregor's New Fancy Roses

(See Illustration in Colors on Second Page of Cover)

In this collection we have grouped together 24 of the finest Garden Roses for summer blooming. They make up a collection of Hybrid Tea Roses, which class is rapidly taking the foremost rank, having been produced by crossing the free-flowering Tea Roses with other varieties of the June-flowering or Hybrid Perpetual classes. This collection not only combines the free-flowering habit of the Tea Rose with the rich and varied colors of the other classes, but also inherits comparative hardiness. The collection shows wonderful results achieved by the most noted Rose Specialists of this Country and Europe.

We will send, postpaid, to any address in the U. S., the full collection of 24 Tested Fancy Roses as illustrated on the color plate on inside of front of cover, amounting to \$4.70 at regular price, for \$3.65; or we will send the collection of 24 new Fancy Roses as illustrated on the color plate in the 2-year size, amounting to \$9.40, for \$7.35. See other offers on page 7.

McGREGOR'S Fancy Geraniums

(See Colored Plate Between Pages 48 and 49)

The list of Geraniums which we show on our colored plate—page 49—will be found to contain the best of the introductions by the foremost growers in Europe and America. They are the finest that we have ever seen and really seem to be perfection. The flowers are large, of splendid form and substance, and the colors and markings simply cannot be described. To say that they are beautiful does not begin to do them credit. Words are inadequate to fittingly describe the magnificent varieties, comprising all imaginable colors, shades and variegations from the most dazzling to the softest and most delicate tints. The colored plate shows what they are like as nearly as it is possible to show with paper and ink. We offer them in the belief that they will meet all requirements and give the greatest possible satisfaction.

SPECIAL OFFER No. B-44—The entire collection of twenty Geraniums shown on the color plate and representing the best introductions of the foremost growers of this and other countries will be sent, postpaid, for \$2.70. Other special offers pertaining to this collection will be found on page 49.

The colored plate of Fuchsias, Petunias, Begonias and Phlox offers a collection of constant blooming plants, varieties of marvelous beauty for the make some of the choicest collections represent wonderful improvements in are prolific bloomers; vigorous in habit grow that all persons should succeed

The following COLLECTIONS illustrated in colors inside back of cover.

nias, Begonias and Phlox offers a color-rich and gorgeous, yet soft in coloring; yard and garden. The 20 sorts offered that will be offered this season. They size, color and beauty of flowers. All of growth; and, in fact, so easy to with them.

McGregor's Constant Blooming FUCHSIAS

Fuchsias are of great merit, in that they bloom constantly, and the strong, robust growing types make excellent outdoor decorative plants, and they have the added value of being especially adapted for shady and half shady places where no other plants will grow. Fuchsias permit of being tamed into large bush plants or standards and after the first year make fine specimens which can be kept and used in this manner for many years. They can be stored in a protected place where such plants as Hydrangeas, Oleanders, etc., are wintered. The collection we offer below gives a grand variety of color and makes up a collection of the best varieties we have to offer you.

McGregor's Double Fringed PETUNIAS

For outdoor decoration or for house culture there are few plants which are as effective as the Petunia. They begin to flower early and continue to be a mass of bloom throughout the summer season and up until they are killed by the frost. They are easily cultivated, simply requiring a good soil and sunny location. After devoting a great deal of time on Petunias, we have succeeded in getting the finest strain or set that we have ever offered. Unsurpassed in brilliancy of colors and the size of the flowers. They include all the brightest shades of pink, purple, rose, white, crimson, etc. They have been carefully selected and the most of them are beautifully fringed.

McGregor's Gorgeous Tuberous BEGONIAS

"This charming class of Begonias is perhaps the handsomest of all summer-flowering tuberous-rooted plants, and are deserving of much greater popularity. Either as bedding plants or grown in pots, their varied colorings are unique, vivid and gorgeous. Flowers of the largest tubers are of immense size and great substance. From the first opening flower until frost arrives, they are a brilliant setting for any garden. The bulbs we offer are grown by an eminent European bulb specialist, and are all first size blooming tubers, true to colors and markings, and we guarantee that our customers will be fully satisfied with the results from plantings.

McGregor's Mammoth Hardy PHLOX

In the collection below, of selected Phlox, we offer five plants which we believe give as great value in a collection as anything offered in our catalog. Among the hardy plants there is no class excelling Phlox. They succeed in almost any soil and location, giving wonderful flowers through a long season, and will continue to flower through many years with no attention. They produce wonderful effects when planted in masses of a single color or when planted in such variety as illustrated on our colored plate. No perennial is more worthy of culture or will produce more satisfactory results. The following collection we highly recommend.

Mr. Henry Sayles, of Abilene, Texas, says: "The Petunias are full of blooms at the present time, October 30th, and for this climate are to the forefront as beautiful bloomers. Are in perpetual bloom from early summer till winter."

Mrs. W. H. Townsend, of Azusa, Cal., says: "I received my box of Begonias today. I have dealt with every reputable florist in the United States, but I have never received such splendid, large thrifty plants packed in such excellent shape."

E. C. C., of Shawneetown, Ill., says: "Certainly can recommend your flowers. Everything I have purchased from you has grown wonderfully. Your Fuchsias are exceptionally beautiful. It would be impossible for me to say too much in regard to them."

Mrs. Geo. E. Price, of Myers-town, Pa., says: "All the plants were in fine condition when I received them. I now have a large flower garden, containing a great many different kinds of flowers. The Phlox are doing fine, and very much admired."

This Collection not only combines the free flowering habit of the Tea Rose with the rich and varied colors of the other classes, but also inherits comparative hardiness. The Collection

THE MOST DESIRABLE NEW ROSES OF 1913

Introduction of Various Prominent European and American Rose Specialists.

The best bloomers for the yard and garden are included in these newer Roses of all kinds. Those offered are of unusual value, most of them having been selected while growing and blooming in Europe the past season. Just as Rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. The number of new varieties of Roses introduced from all parts of the world will average about one hundred per year. After a thorough test, usually from five to ten sorts each year will come up to the mark as being worthy of cultivation. The Roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties; and though, as with all Roses, some are of growth and habit such as to make them adapted to certain sections of the country, generally speaking all will be found highly desirable.

Mrs. Geo. Shawver

(Half Hardy.) This great English Rose is as free in growth as Radiance, with stiff, erect stems; we believe it to be the greatest producer of bloom in the family. Buds very large and of a very high brilliant shade of pink. Fine for bedding or for forcing. 1-yr. 50c ea., 3 for \$1.25; 2-yr. \$1.00 ea., 3 for \$2.75.

Margaret

Edward Mawley

(Half Hardy.) By its marvelous outstanding qualities, is now generally regarded by rosarians as the greatest advance and most wonderful Rose yet raised. We have no hesitation in stating that it is the finest of all dark crimson Roses, a true perpetual flowering H. T., and the most beautiful variety the Rose world has yet seen. 1-yr. 35c ea., 3 for \$1.00; 2-yr. 75c ea., 3 for \$2.00.

5 GRAND HERMOSA ROSES

Popular Pink Hermosa

"Hardy as a Lilac; free-flowering as a Geranium."

Pink Hermosa is the best known in the entire Rose family and a universal favorite. Hardy as a Lilac-bush and as free-flowering as a Geranium; it combines everything most desirable in a Rose. The flower is cupped, finely formed and full, color a most pleasing shade of pink, soft but deep, very fragrant. Price 15 cents each, 3 for 40 cents, 12 for \$1.25, postpaid; two-year plants 30 cents each, 3 for 80 cents, 12 for \$2.75.

White Hermosa

"We counted on one plant 143 buds and flowers."

This is a lovely white Rose, a pure Tea, but a foreign seedling; the freest flowering white rose we have seen. For a pot plant it cannot be excelled as it possesses every good quality of a pot Rose. We counted on one plant 143 buds and flowers, and the plant was only nine months old. Try it. Price, 10 cents each, 3 for 25 cents, 12 for 90 cents; two-year plants, 25 cents each, 3 for 65 cents, 12 for \$2.50.

Yellow Hermosa

"No Rose like it for freedom of bloom."

No Rose like it for freedom of bloom. It is a fine grower and carries numbers of flowers on every shoot. A fine yellow Rose, large, not at all formal, but very attractive. Called the Yellow Hermosa from its free-flowering character. We do not know of any Rose that will give the satisfaction that this variety will and we heartily recommend it. Price, 15 cents each, 3 for 40 cents, 12 for \$1.25, postpaid; two-year plants, 30 cents each, 3 for 80 cents, 12 for \$2.75.

Red Hermosa

"Unmatched in its velvety richness."

The flowers of this variety are the richest red of any Rose in our vast collection; a single bud or blossom will catch the eye at a great distance so brilliant is the color. Indeed, it is unmatched in its velvety richness; could well be termed "The Velvet Rose." It is as free in blooming as Bon Silene. One of our customers in California writes that she is kept busy by people asking her what Rose this is. Price, 15 cents each, 3 for 40 cents, 12 for \$1.25, postpaid; large two-year-old plants, 30 cents each, 3 for 80 cents, 12 for \$2.75.

Crimson Hermosa

"The very best of all Roses for bedding."

This is, without doubt, the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery scarlet, a color seldom seen in Roses. Indeed, a bed of this Rose produces a mass of red equal to a bed of Geraniums. None better. Try it. Price, 10 cents each, 3 for 25 cents, 12 for 90 cents; large two-year-old plants, 25 cents each, 3 for 65 cents, 12 for \$2.50.

The National Rose of America

The American Beauty

The Greatest of them All

A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals take the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name.

Price, strong plants, one-year, 20 cents each, 3 for 50 cents, postpaid; two-year, 35 cents each, 3 for 95 cents, postpaid; three-year, 50 cents each, 3 for \$1.25 (by express); three-year (extra heavy plants), 75 cents each, 3 for \$2.00 (by express).

HARDY HYBRID PERPETUAL ROSES

These roses will succeed in any locality and are so hardy that they will live through the severest winters with but a light protection of leaves or coarse manure. All bloom freely at the usual time, early in the season, and some varieties, like Mme. Masson and Mme. Charles Wood, continue to bloom from time to time during the summer and autumn.

Large Leaved Rex or Painted Leaf Begonias

Louise Closson, 20 cents.

LOUISE CLOSSON

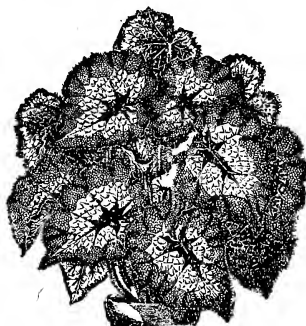

One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep bronze with broad band of silvery-rose, edged bronze, giving the whole a purplish tint. The oddest color of all the Rex. Price, 20 cents each; three for 50 cents.

KING OF REX

One of the most effective of its class, though the oldest variety. Of a beautiful metallic luster, center and edge a soft velvety green with a broad silver zone terminating at the point. The foliage of this Begonia on well-grown specimens is so massive and the growth so majestic as to awe the beholder. Indeed, we doubt if we have a handsomer plant than this. It is of the very easiest culture. Anyone can succeed with it. Price, 20 cents each; three for 50 cents.

Rex Begonia, King of Rex, 20 cents.

EDWARD THE FOURTH

This is a novelty without a superior in the Rex family. The young leaves are spotted green, edged with a very dark brown band, while the older leaves have a center of deep brown, bordered with dotted green and the leaf edged with the same color as center. One of the darkest varieties. Price, 25 cents each; three for 65 cents, postpaid.

MIKADO

One of the freest growing Rex Begonias, throwing out great clusters of leaves which are exquisitely beautiful. They are edged with a narrow band of dull soft pink, especially prominent in the older leaves, which also have a pinkish cast. The body of the leaf is of a metallic-green with a dark center. The difference in this Begonia lies in the striking pinkish cast of the leaf. Price, 25 cents each; three for 65 cents, postpaid.

Rex Beg. Ruth Findlay, 15c.

RUTH FINDLAY

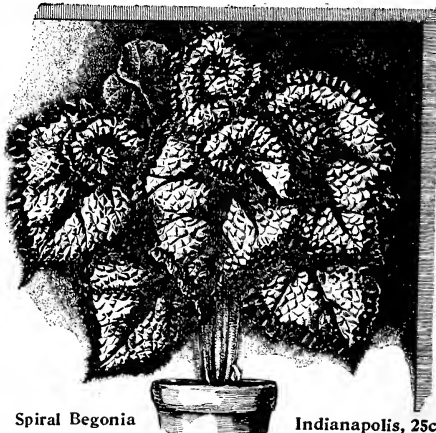

A very short, bushy-growing variety. The most part of the leaf is of a silver color, streaked with dark green on the edges. Price, 15 cents each; three for 40 cents.

Spiral Begonia

Indianapolis, 25c.

SPIRAL LEAF REX BEGONIA Countess Louise Erdody

The leaf has a metallic luster, dark-silvery in the center; shading to coppery-rose toward the margin. The striking peculiarity which distinguishes it from all other Begonias consists in the fact that the two lobes at the base of the leaf do not grow side by side, but one of them winds in a spiral-like way until in a full grown leaf there are four of these twists lying on top of the leaf nearly two inches high. Price, 25 cents each; 3 for 70 cents; 6 for \$1.25.

Rex Begonia Rubrum, 20c.

Rex Beg. Rubrum

The entire leaf has a pinkish-metallic lustre which makes it one of the most attractive varieties. The leaf is very large with a smooth edge and the plant is a vigorous grower. Price, 15 cents each; 3 for 40 cents; 6 for 75 cents.

Rex Beg. Lesoudsii

This is the finest and largest of any of the Rex family. It is impossible to describe in words the beautiful markings of this magnificent Begonia. It is a cross between Begonia Diadema and a Rex variety, but retains in a marked degree the Rex character. We consider this the finest of all the Rex family, both in size of leaf and rich coloring. Price, 15 cents each; 3 for 40 cents; 6 for 75 cents.

Roi Ferd Major

BEAUTIFUL DECORATIVE FERNS

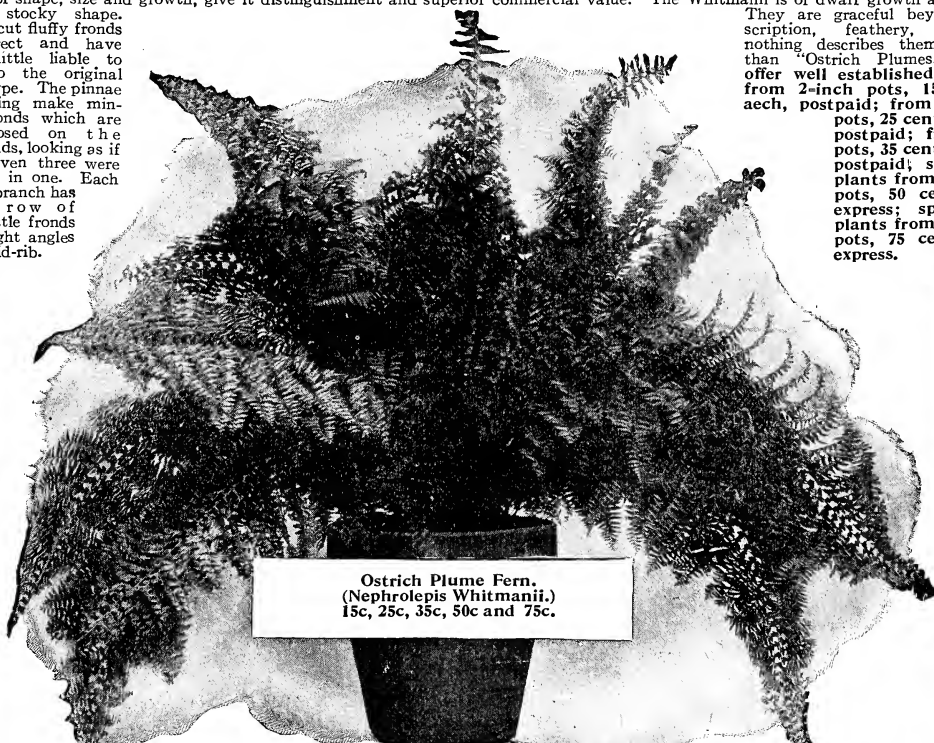

THE BEST FOR HOME AND PORCH DECORATIONS

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The *Nephrolepis* family, of which the well-known Boston is a member, has furnished us many beautiful species of late years.

THE BEAUTIFUL OSTRICH PLUME FERN (*Nephrolepis Whitmanii*)

"The Ostrich Plume" Fern, *Nephrolepis Whitmanii*. The graceful pluminess and charm of the new *Nephrolepis*, its characteristic features of shape, size and growth, give it distinguishment and superior commercial value. The *Whitmanii* is of dwarf growth and wide upright, stocky shape. The fine cut fluffy fronds stand erect and have proved little liable to revert to the original Boston type. The pinnae sub-dividing make miniature fronds which are superimposed on the main fronds, looking as if two or even three were contained in one. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib.

They are graceful beyond description, feathery, plummy; nothing describes them better than "Ostrich Plumes." We offer well established plants from 2-inch pots, 15 cents each, postpaid; from 3-inch pots, 25 cents each, postpaid; from 3½ pots, 35 cents each, postpaid; strong plants from 4-inch pots, 50 cents by express; specimen plants from 5-inch pots, 75 cents by express.

Ostrich Plume Fern.
(*Nephrolepis Whitmanii*.)
15c, 25c, 35c, 50c and 75c.

THE SPRINGFIELD FERN

A valuable Fern, especially for vases, baskets, and box work, of very erect growth, the fronds more stiff than the Boston, and similar to the *Pieronii* Fern. It is a vigorous growing variety, and we believe will prove very popular. Price, nice young plants, 15 cents each; strong plants, 35 and 50 cents.

NEW PLUMED FERN

(*Elegantissima* or *Tarrytown*.) This is a sport from the *Pieronii* Fern; the plant is of much more compact habit, one-half as tall, but with all the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each, postpaid.

THE BOSTON FERN

(*Nephrolepis Exaltata Bostoniensis*.) This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents.

The Newport Parlor Fern

(*Nephrolepis Scotti*.) It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about twenty inches in length and three inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.

The Boston Fern, 10c, 25c and 50c.

The Boston Fern, 10c, 25c and 50c.

The Plumed Scotti Fern

(Nephrolepis Scholzei).

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae sub-divided, giving it an airy, feathery appearance. Price, nicely shaped plants, 15 cents; larger sizes, 30 and 75 cents, postpaid.

McGregor Bros. Co.—Received Ferns today. I have dealt with every reputable Florist in the United States, but I have never received such splendid, large, thrifty plants packed in such excellent shape. Mrs. W. H. Townsend, Azusa, California.

Plumed Scotti Fern.

New Plumed Fern, Piersoni

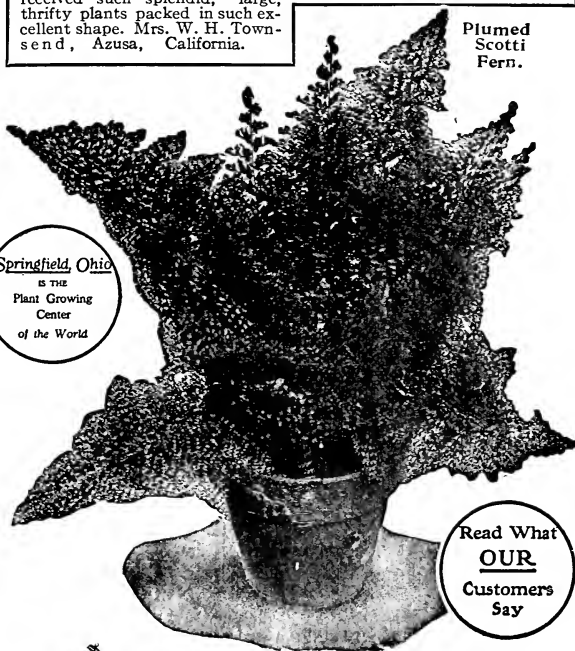

An entirely new form of Boston Fern. The pinnae sub-divide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed in one. They are graceful, feathery, plumed, nothing describes them better than "Ostrich Plumes." Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each.

The Fish Tail Fern

(Nephrolepis Davallioides Furcans).

This is a grand Fern, entirely distinct from any of the other varieties of Nephrolepis. Throughout the South, and especially at New Orleans, this Fern takes precedence over all others. The ends of each pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the Nephrolepis. Grand for house culture. Nice young plants, 20 cents each.

The New Fern.

"Roosevelt"

Introduced as "The Greatest Fern of the Age."—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First, it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended. Fine, young plants, 20 and 35 cents; stronger plants, 50c., postpaid; strong specimen plants, 75c. each, by express only.

Roosevelt Fern, 20c., 35c., 50c. and 75c.

Crested Fern

(Nephrolepis Superbissima).

The latest improvement in this family of Ferns, unique in foliage, quite different from all other varieties of this family, standing in a class by itself. It makes a dwarf, compact growth, similar to the Scotti Fern, the fronds, however, being more dense, firm and rigid, and the foliage several shades darker than any Fern coming from the Boston type. Price, nice young plants, 20 cents, larger 35 cents; strong plants, in 4-inch pots, well established, 50 cents each.

Hardy Ferns

These graceful and universally popular plants are of easy culture and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. There are many places more or less shut out from the sunlight that may be converted into veritable beauty spots by clumps of Ferns of various kinds and their intrinsic ornamental qualities are well worthy of our attention. Price, 25 cents each; 3 for 70 cents; 6 for \$1.35; \$2.50 per dozen, by express only.

Keep the ferns from dust and sprinkle slightly every warm day. Price, 15 cents each, 3 for 40 cents, postpaid.

Improved Holly Fern

The leaf of this variety is a rich, glossy green, and each leaflet about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting qualities. Price, 15 cents each, 3 for 40 cents.

Beautiful Palms and Decorative Plants

Phoenix Reclinata, 15c-25c

Date Palm

(Phoenix Reclinata.)

One of the hardiest of the date palms with dark green feathery foliage, of strong growth. It is especially valuable for outdoor decoration as it stands sun and wind without the least damage even in exposed situations. Price, 15 and 25 cents each, postpaid.

Phenix Canariensis

This is one of the most exquisitely graceful among Palms. Its wide-spreading, gracefully arching fern-like leaves are elegant and effective for apartment decoration. Nice plants, 20 cents each; larger size, good plants, for 35 cents.

Dracena Indivisa

A very beautiful house or garden plant, with slender, drooping leaves, often called a "Fountain Plant." The leaves are of several shades of green, with delicate stripings of yellow and red, which become marked as the plant grows older. Price, 10 cents each; larger plants, 25 and 50 cents.

Kentia Belmoreana, 75c, \$1.25, \$1.75 and \$2.50

Notice

It may be well to state here that young Palms do not resemble the illustrations given, as they do not show their character leaves until the second and third year, so that when you order small Palms and see long, narrow leaves instead of the character leaves, as shown in the illustration, do not think that the wrong kind has been sent you.

Areca Lutescens

\$1.00, \$1.50

This is the typical Palm and is more largely grown than all other varieties combined (possibly excepting the Kentias). Its vigorous, healthy habit and large, glossy green, fan-like leaves commend it to all. Nothing is more satisfactory as a decorative plant than a well grown specimen of Latania. This is the Palm from which the Chinese Palm Fans are made. Adapted to all decorative purposes within or without doors. Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each; large specimen plants, \$1.00 and \$1.50, by express.

Fan Leaved Palm (Lat. Borbonica) 15c, 25c, 50c, \$1, \$1.50.

McGregor's Fragrant Garden Carnations

When the people throughout the country were vainly seeking for an appropriate flower, acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue.

While it is generally conceded that the rose ranks first for producing flowers for cutting, the carnation is gaining in popularity for its profusion of bloom, easy culture, and for the exquisite fragrance of its flowers.

The last few years have seen an entirely new carnation, forming one of the most beautiful and desirable flowers we have, flowering freely during the summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter. We take pride in offering the following collection:

Pink Delight A pure glistening pink, similar to the old popular Francis Joost. Always a popular shade. Blooms early and continuously, flowers often reaching 3½ to 4 inches in diameter. A very promising variety **20c**

White Enchantress Stems strong and graceful. Flower of good form and pure white color. Delightfully fragrant. **15c**

Theodore Roosevelt A carnation that has been given the highest recommendation. Color, deepest crimson. Of unusual size, 3½ inches in diameter, of high and full form. Strong calyx. Long stiff stem and fragrant flower **20c**

May Day Delicate pink. Vigorous growth. Color, when at its best, very soft, clear and pleasing. Does well in nearly all soil. **15c**

Victory A large flowering variety with a striking scarlet bloom. Very attractive and distinct, and with all the good points of the outdoor and indoor growing carnations **15c**

Sunbeam Flowers, light clear yellow of strong and vigorous growth, with fine healthy foliage. Color, does not look white when under artificial light as with some yellows. **15c**

Enchantress A very pleasing shade of light pink. When fully developed flowers measure over 4 inches in diameter. Very attractive and of fine form. Growth is ideal. Develop magnificent blooms under ordinary culture. **15c**

Bonfire An early, free and continuous blooming variety of strong and robust growth. Produces strong stems holding flowers of fine form and good substance. Color, brilliant deep scarlet. Very fragrant. **15c**

Painted Lady The flowers are full and double, and have a delightful clove fragrance. The color is pure white ground, beautifully striped with bright pink and scarlet—reminding one of the beautiful tints seen in Azaleas and Rhododendrons. **20c**

Dorothy Gordon Color, a beautiful shade of carmine-pink. Flowers, 2½ to 3 inches in diameter, borne on stems 18 inches long. Always healthy and free from disease. Blooms early and continuously. **15c**

C. W. Ward Very large, full and well formed flowers on exceptionally strong stems producing an enormous crop of immense blooms. Color, bright salmon rose. Very highly scented. **20c**

Gold Nugget A beautiful yellow variety. In all points it is not to be excelled. Of strong growth. Free flowering. Long strong stems. A beautiful large rounded flower of a deep golden yellow marked with faint red stripes. **20c**

Commodore A novelty of this year. Color, beautiful scarlet-crimson. Flowers, large, full and deeply fringed. Free blooming, and one of the best cut flower varieties to be had. **30c**

Ruby Color, soft scarlet. Large size flowers—high built center. Strong stems. Growth healthy and vigorous. Sweetly scented **20c**

Niagara Surpasses any white carnation on the market for size, form and purity of color. Has a glistening luster in its texture. Produces stiff stems, and flowers highly fragrant. **10c**

Midnight One of the grandest red carnations ever introduced. Color, deepest crimson. Will win premiums over all cut flowers. The largest size—ideal for cut flowers **20c**

Apple Blossom Color, clear white, heavily edged and striped with bright scarlet, giving it a bright and cheerful appearance. Flowers enormous with center petals standing erect. Very striking **20c**

NEW FANCY JAPANESE CHRYSANTHEMUMS

Chrysanthemums are of Japanese and Chinese origin. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unquestioned title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, ease of culture and certainty of flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

ASTERMUM

A GLORIFIED ASTER

This new and distinct Aster grows to a height of 18 to 24 inches, and yields ten or more flowers to each plant, on long, upright stems. The blooms are truly wonderful, being more like immense Chrysanthemums than the usual Asters—hence the name. The form of the flowers is like the long-petaled, fluffy Comet Aster, but is fuller in the center and very much larger, with a curl in the petals seen only in the newer Chrysanthemums. The three colors are unsurpassed. The lavender is clear and most brilliant, the pink is the color of a LaFrance Rose, the white is like driven snow. Our seed is grown by the introducer of this grand novelty. The Astermum received highest honors at the Florists' Convention for 1912, and was spoken of as a phenomenal flower by the florists in attendance. Offered now for the first time to flower lovers.

McGREGOR'S Selected Flower Seeds

We have used the greatest care in obtaining our Flower Seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

STRAWBERRIES—The Best Fruit That Grows

McGregor's Earliest Strawberry, 25c doz.

All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens and are termed pistillate or imperfect flowering varieties and must be planted near some perfect-flowering sort or they will produce little or no fruit. We advise fall planting for the best results. **Dip the roots of the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out.** Do not wet the tops or you will rot the plants. Neglect for an hour or so is often fatal.

Each berry is an inch long, thick, meaty, melting, sweet, with almost no core and unusually rich. The sprouts do not come up from the ground as blackberries do, but all start from one root. When a year old and afterward, the canes send out fruit laterals which get to be sixteen to forty feet long, and upon these are borne the enormous crops. The berries are clustered on the outside of the bush, not in among briars, where they would be hard to pick. Plants are hardy as an oak. Price, strong plants, each 25 cents; \$2.00 per dozen.
